Waste Management Services

Recycling London

●●● **Recycling**
London

*Laying the foundations for
a sustainable future.*

A reputation built on innovation

The waste disposal needs of businesses are changing radically

Who are we?

HTL Recycling and Waste Management Services was established in 1977 making us one of the longest established recycling specialists in the South east.

Our experienced family run regional business has serviced London and the M25 regions through the dramatic legislative and service changes that the waste industry has undergone.

Our commitment to a cleaner greener city required forward thinking, innovation and investment in people and plant to ensure we can provide the highest standards of service.

Recycling and Landfill Diversion is at the forefront of our policy commitments.

Ensuring that valuable resources are reused and recycled and landfill is reduced.

Our own recycling and waste transfer facilities which are strategically situated close to the City of London and the West End.

Our state of the art logistics software designed by SAP incorporates weighbridge technology and duty of care and key performance indicators to enable accurate audit of your business with us.

Our newest policy decision has been to aim for zero landfill and carbon neutral services using cleaner vehicles and utilising our logistics software to full potential as well as carbon offsetting.

HTL is one of the UK's leading recycling-led waste management companies, offering national coverage.

What do we do?

HTL Recycling and Waste Management Services are the owner operators of the Deptford Recycling Centre and The Erith Waste Transfer Station.

We currently operate a wheeled bin collection service throughout the London and M25 regions. Our main focus with this service is the collection of co-mingled dry recyclates. We provide a simple collection service for mixed paper, cardboard and plastic which is returned to our centre in Deptford for sorting and onward shipping for reprocessing. With scheduled collections of wheeled bins of every size or recycling bag collections we aim to ensure your decision to recycle is simple and straight forward.

Both Deptford and Erith operate skips and roll on off's as well as compactors for commercial and construction waste. Compactors are also used for the volume collection of mixed recyclables. Both sites also offer waste transfer facilities with the latest plant and machinery used to extract the maximum amount of recyclable material. Both sites provide WEEE collection, quarantine and forwarding to reprocess plants. Full audit trail included.

Our recycling and waste advisory staff will guide you through the legislative and service issues to enable a simple cost efficient collection service that will also assist in environmental responsibility compliance.

What this means to you

HTL seeks to ensure the following

- The operation of a Best Practise Environmental Option service to our customers whenever possible.
- The Recycling facilities are managed to the highest standards.
- Innovative thought and practise in developing processes to fully utilise and realise the potential for recovery and recycling.
- To provide reliable cost effective environmental solutions to your recycling needs.
- Trust us to handle your recycling and you and your staff can rest assured that you are doing your best for the environment.
- We collect mixed recyclables so you can simply maximise your recycling performance at no extra effort. We separate the recyclates into streams.
- One point of contact for all your waste needs.
- Duty of Care and Waste Transfer certification provided to ensure compliance with the latest legislation.
- Recycling schemes designed to suit you.

“Big enough to cope small enough to care”

The pressure on business to be environmentally friendly and cost effective grows with each year. The government is targeting business through the landfill tax and new legislation. HTL aims to help you recycle more, simply. We want to help you maximise your recycling efforts by providing services to suit your requirements.

Call us to discuss your recycling and waste management needs. We are sure we can help you cut your disposal costs and recycle more.
